

Hurricane Harvey ESF – 10 Unified Incident Action Plan (IAP-6)

**Operational Period:
Starting: 09/05/2017 @ 0700
Ending: 09/06/2017 @ 0700**

1. Incident Name: Hurricane Harvey – ESF 10 Texas	2. Operational Period: (Date / Time) From: 09/05/2017 @ 0700 To: 09/05/2017 @ 1900 <i>0700 MAL</i>	INCIDENT OBJECTIVES ICS 202 - EPA																				
3. Incident Objective(s): <ul style="list-style-type: none"> Provide for the safety, welfare and security of response personnel. Maximize the protection of public, health, and safety. Identify affected drinking water and wastewater systems in each area, evaluate the systems to determine their operational status and facilitate system contact with Federal, State, and Local agencies (provide technical assistance). Conduct wide area assessment to identify orphaned containers equal to or greater than 5 gallons, potential or actual discharges from vessels and/or facilities, and document the most effective means for recovery or mitigation in accordance with Natural Disaster Operations Workgroup protocols. Prioritize, mitigate/recover product, and monitor identified pollution targets. Assess DHS critical infrastructure and RMP/FRP facilities for damage and immediate/ongoing releases. Identify secure areas to process and temporarily store for subsequent recycling, disposal, or return to original owner displaced orphan containers, above ground storage tanks, hazardous waste, and vessels. Identify locations and establish ESF 10 ICP, Branches, and Staging Areas commensurate to the size and scope of the incident. Establish and maintain a common operating picture (COP). Identify and maximize protection of environmentally sensitive areas and threatened species. Manage a coordinated interagency response effort that reflects the composition of the Unified Command. Establish an IMT that can meet the initial and long-term challenges required for incident mitigation. Inform the public, stakeholders, and the media of response activities. Ensure appropriate financial accounting practices are adhered to. Establish a vessel recovery strategy. Establish a strong interagency partnership with public and private organizations to determine ownership and disposition of targets. 																						
4. Operational Period Command Emphasis. (Priorities, Key Discussions/Directions): <ul style="list-style-type: none"> "Get them back to normal" All field activities will be conducted using the NDOW Standard Operating Procedures, NDOW tools, and Response Manager. Agencies will work in coordination under Unified Command. Establish a Hurricane Evacuation Plan for responders and assets which minimizes the disruption to response efforts. 																						
5. General Situation Awareness (Safety bullets, Weather, etc...):																						
<input checked="" type="checkbox"/> Approved Site Safety Plan Located at: Safety Officers' desk

1. Incident Name	2. Operational Period (Date/Time)	Command Direction ICS 202A-CG
Hurricane Harvey – ESF 10 Texas	From: 09-05-17 @ 0700 To: 09-06-17 @ 0700	

3. Key Decisions and Procedures: (Ref IMH pg 4-1 to 4-2)

NAME OF INCIDENT: Hurricane Harvey ESF-10 Texas

OPERATIONAL PERIOD: 24hour operational period

FUNCTIONS: Safety, Oil Spill & Hazardous Substance Release and Threats, Environmental Protection, drinking water and waste water facility assessment.

ASSISTING & COOPERATING AGENCIES: EPA, TCEQ, TGLO, USCG, NOAA, CST, Austin Police, USFW, TPWD

ORGANIZATION: (Consider Shift Work)

- **AGENCY EXECUTIVE(S): FEMA JFO**
- **INCIDENT/UNIFIED COMMAND:** EPA is the lead agency for ESF-10 and USCG is Deputy to support state of TX in accordance with NRF. The ESF-10 Unified Command consists of TGLO, TCEQ, EPA and USCG.
- **COMMAND STAFF:**
 - PIO – EPA, assistants as necessary
 - LOFR – EPA, USCG assistant
 - SOFR – CST, ASOFR – USCG, EPA
 - NOAA-SSC
 - Legal Officer – TBD
- **GENERAL STAFF**
 - OSC – EPA with each participating UC agency as Deputy
 - PSC – EPA, with each participating UC agency as Deputy
 - LSC – EPA, with each participating UC agency as Deputy
 - FSC – EPA, Deputy USCG (for FPN mgnt)

FACILITIES:

- ICP/ALPHA BRANCH LOCATION: Corpus Christi, Texas; Intend to move ESF10 ICP to centralized location (TBD).
- BRAVO BRANCH LOCATION: Houston, Texas
- JIC LOCATION: Full FEMA JIC TBD
- Airport: Corpus Naval Air Station

Delegation of Authority:
All Section Chiefs are empowered to staff according to the needs of the response.

IMT Procedures/Function: The National Response Framework, ESF10 annex, the Area Contingency Plan, and Geographic Response Plans, and TGLO tool kit will be used, as appropriate, in planning operations.
All field activities will be conducted using the NDOW Standard Operating Procedures, NDOW tools and Response Manager
All responders will use USCG/EPA IMH and job aids as the IMT SOP. All IMT members shall review their section responsibilities.

UC Functionality:
Core hours of the UC will be from 0700 to 1900.
UC shall approve all media releases.
UC will approve visitation of VIPs to the response sites.
The UC members will work with their Deputies to ensure someone is accessible 24 hours/day.

4. Priorities: (Reference IMH pg 4-2 to 4-3)

1. Life - Safety of Public and Responders
2. Drinking Water and Waste Water systems
3. Assessment, prioritization and mitigation and monitoring of oil and hazardous substance targets throughout impacted area utilizing NDOW protocols
4. Environmental Protection
5. Information management and situational awareness
6. Unified and efficient government support to the state of Texas

5. Limitations and Constraints: (Ref IMH pg 4-3 to 4-4)

MANAGERIAL:

Working under large FEMA led disaster response organization.
Impacted area crosses 3 COTP zones; Delegation of FOSC authority pends.
Oil response funded under separate FPNs

POLITICAL ENVIRONMENT:

Media Coverage: There is likely to be high media interest.
Public Confidence/Perception
Potential for Adverse Economic/Environmental/Health and safety Impacts:
There has been a Large Scale Evacuation with numerous displaced citizens

FINANCIAL:

Funding Sources: EPA has been issued an \$8.5Million ESF10 mission assignment. EPA will manage the cost accounting for these funds.
USCG will utilize FPNs for oil spills. USCG will manage the cost accounting for these FPNs. USCG MA is pending approval.

LOGISTICAL:

Multiple resource ordering processes may confuse the process.
Lodging availability is scarce.
Personnel must travel long distances to conduct response operations.
Each agency will use their own logistics processes.

OPERATIONAL/SAFETY/ENVIRONMENTAL:

Night operations on as needed call-out basis.

RESOURCES: Limited Staffing Resources for adequate IMT.

GEOGRAPHY/TERRAIN: Impact of the event is widespread over a large geographic area. Impacts cross 3 Captain of the Port zones and entire EPA Region.

PHYSICAL ENVIRONMENT: Heat stress must be considered during each and every operation.
Numerous health safety hazards.

6. Prepared by: (Planning Section Chief)
Matthew Loesel/Lt Jillian Hoffman

APPROVED Talking Points

09/05/17

DO: TALK ABOUT YOUR WORK AND WHAT YOU ARE DOING; AVOID NO COMMENT

DON'T: TALK ABOUT OTHERS' WORK OR SPECULATE

- EPA has an organized emergency response program and is supporting FEMA, state, local and tribal partners.
- Safety is EPA's top priority
- EPA responders are full integrated in a UNIFIED COMMAND with Texas Commission on Environmental Quality and Texas General Land Office, US Coast Guard
- Flood water is contaminated. Contact should be avoided.
- EPA is supporting the response effort in several ways:
 - Drinking water and waste water staff will offer technical assistance as necessary to restore services. Teams will visit or contact facilities if needed.
 - Superfund site managers worked to secure sites before the storm. Teams are continuing to assess site conditions and determine additional actions as necessary.
 - EPA is working with state partners to assist in contacting industrial facilities, determine status and plans to resume operations
 - EPA TAGA vehicle and ASPECT plane have been deployed to monitor developing environmental impacts
- Response teams will continue to evaluate affected areas and determine necessary actions as appropriate

Instructions for Field Personnel:

For Media Inquiries Contact R6HarveyPIO@epa.gov

1. Incident Name:	2. Operational Period: (Date / Time)	“Safety Message”
Hurricane Harvey – ESF 10 Texas	From: 09-05-17 @ 0700 To: 09-06-17 @ 0700	

Mosquitos & Hurricanes

After a hurricane has passed through an area and flooding occurs, mosquitoes will lay eggs near standing water. Mosquito populations usually increase greatly after flooding. Most of these mosquitoes are considered nuisance mosquitoes and will not spread viruses. However, some types of mosquitoes could spread viruses like Zika, dengue, or West Nile.

Hurricanes and Mosquitoes

- Adult mosquitoes outside do not generally survive high winds during a hurricane.
- Flooding washes away mosquito larvae and immediately causes a temporary decrease in the mosquito population.
- Within days of flooding, mosquito eggs will hatch and adult mosquitoes that survived the storm will lay new eggs. Within a couple of weeks, mosquito populations will greatly increase. Most of these mosquitoes are considered nuisance mosquitoes and will not spread viruses.

Hurricanes and Viruses

- Studies show that hurricanes and floods do not typically cause an increase in viruses spread by mosquitoes, like Zika or West Nile.
- However, because people spend more time outside cleaning up after a hurricane or flood, they are more likely to be bitten by mosquitoes.
- Small increases in the numbers of Protect Yourself and Your Family from Mosquito Bites
- Wear long-sleeved shirts and long pants
- Use Environmental Protection Agency (EPA)-registered insect repellents with one of the following active ingredients: DEET, picaridin, IR3535, oil of lemon eucalyptus, para-menthane-diol, or 2-undecanone. °See EPA’s search tool [here](#).
 - Always follow the product label instructions.
 - Reapply insect repellent as directed.
 - Do not spray repellent on the skin under clothing.
 - If you are also using sunscreen, apply sunscreen first and insect repellent second.
 - Prevent mosquito bites

Texas: Hurricane Harvey and Mosquito-borne Viruses

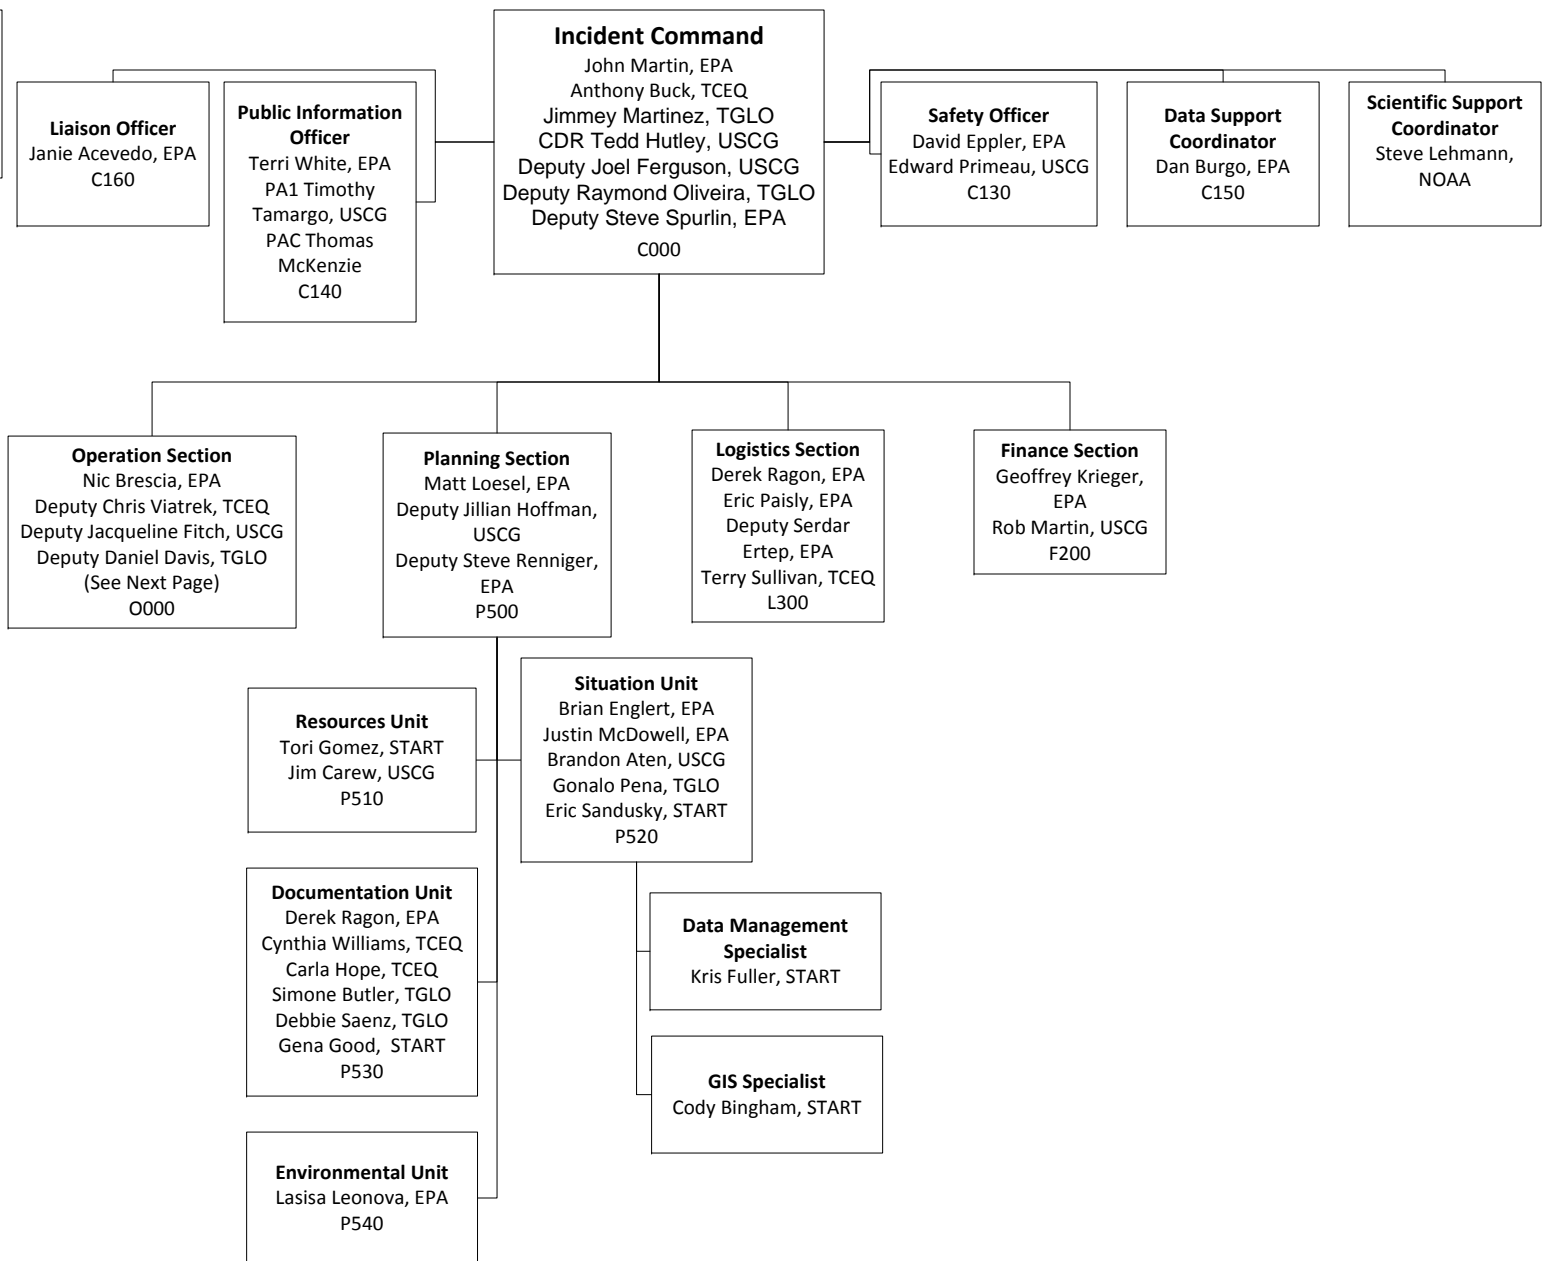

Prior to Hurricane Harvey, no local spread of Zika, dengue, or other viruses spread by *Aedes aegypti* or *Ae. albopictus* mosquitoes had been reported in Houston or the areas affected by flooding. Although the flooding caused by Hurricane Harvey is severe and an increase in mosquito populations is expected in the coming weeks, CDC does not expect to see cases of Zika appear in the area because of flooding.

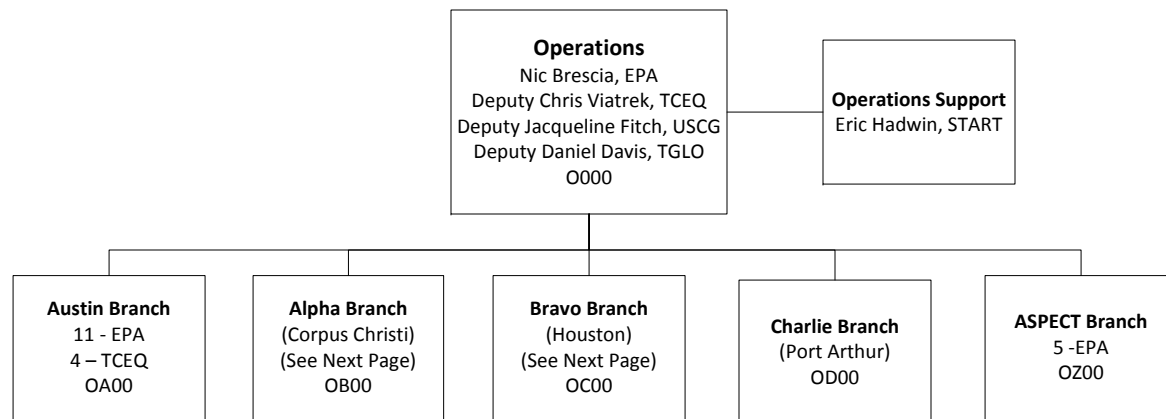

West Nile virus is primarily spread by *Culex* mosquitoes. Cases of West Nile virus have been reported in Texas this summer. CDC does anticipate additional cases of West Nile virus to be reported throughout the summer, but not as a result of flooding from Hurricane Harvey.

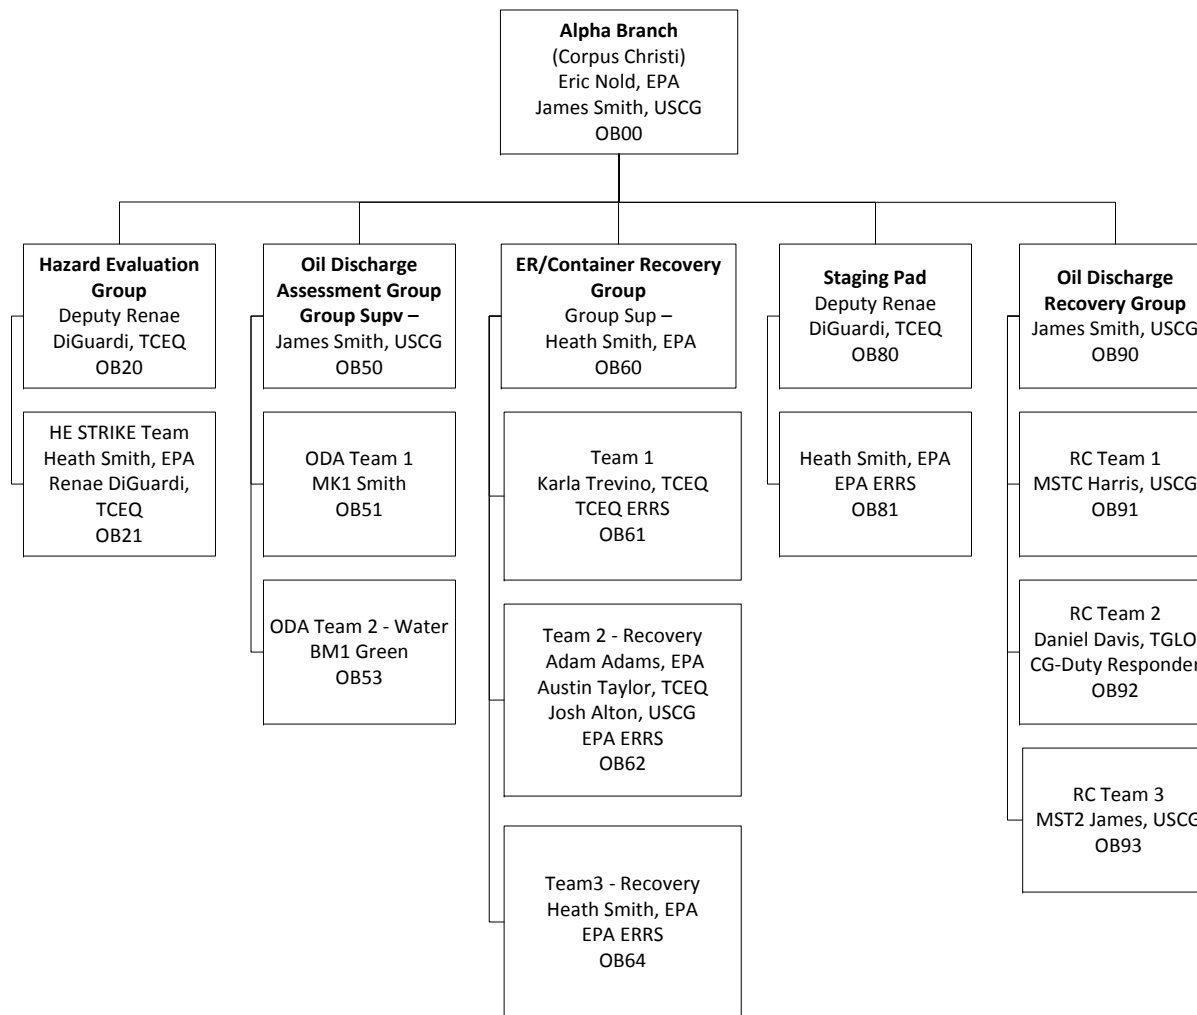

About 1 in 5 people who are infected develop a fever with other symptoms such as headache, body aches, joint pains, vomiting, diarrhea, or rash. Most people with this type of West Nile virus disease recover completely, but fatigue and weakness can last for weeks or months.

Conduct site assessments at wastewater facilities. Prioritize facilities, and determine the overall operational status of those facilities through an on-site evaluation. Utilize the NDOW Water Infrastructure Evaluation SOP and document targets utilizing Response Manager via a laptop or other applicable electronic device as well as utilizing the Wastewater Infrastructure Evaluation Data Sheet and Damage/Assessment status codes. Teams will also use the Infrastructure Photo Placard form to document all photos. All data and photos to be entered and synced into Response Manager daily and complete a 214B to document team field activities.					
8. Special Instructions:					
When the heat index is around 100F, drink 1 cup of water every 15 – 20 minutes. Generally, fluid intake should not exceed 6 cups per hour. During prolonged sweating lasting several hours, consume sports drinks containing balanced electrolytes. Signs and symptoms of heat exhaustion – cool, moist skin, heavy sweating, headache, nausea or vomiting, dizziness, light headedness, weakness, thirst, irritability, elevated body temperature, decreased urine output. Address any safety concerns to MSTC Sawyer: (904) 755-4860
